

OFFICE SPACE FOR STOP THE TRAFFIK

Seeking a new type of partnership where commercial space is donated to provide a charity with a sustainable place to call home

All of us are navigating a new way of working and we believe this offers a new way for not-for-profits and businesses to work together, especially in a world managing the effects of Covid-19.

We are now looking for a new partnership to find a new arrangement of how office space can be shared. As a charity, rather than paying for rent, we want to make effective use of our donations and invest them directly into our projects. We are looking for a commercial partner who is looking to use their office space in new and creative ways. By investing this space into STOP THE TRAFFIK, you will be contributing to a world where prevention is possible and people are not exploited and trafficked.

We are a highly professional, original, energised group of change makers drawn together with diverse capabilities and driven by one vision to STOP THE TRAFFIK.

STOP THE TRAFFIK is looking for an office space for the next 3+ years that can accommodate 30 staff within London's Zone 1.

The ideal office would have:

- Access to meeting spaces that can accommodate project teams, private virtual calls, presentations with clients, as well as larger, team-wide trainings & workshops;
- Access to kitchen and social facilities;
- Secure storage for small quantities of financial documents, equipment, and merchandise;
- Standard IT infrastructure to support general office use.

As a corporate partner donating office space you will also benefit. This could suit a corporate who is looking to adapt its use of space under a lease with time to run and a desire to innovate.

In return for donating office space, you can:

- Claim back tax relief from your in-kind donation;
- Claim back business rates for used office space
- Receive project updates that highlight the change your donation has made, which can be used in your CSR reporting;
- Get your first-year access to the TAHub (<https://www.traffikanalysis.org>) for free;
- An opportunity to share skills & knowledge for future projects

STOP THE TRAFFIK

PEOPLE SHOULDN'T BE BOUGHT & SOLD

STOP THE TRAFFIK is a not-for-profit that works with transnational business leaders, governmental bodies and other community organisations to prevent human trafficking. Using our intelligence-led capabilities, driven by AI, we are disrupting the global industry that relies on exploitation.

Our work has included working with 150+ global, local and community organisations. Partners who have joined us in this mission include tech leaders, such as IBM and Facebook, financial service providers, such as Santander, Red Compass and Western Union, as well as large scale businesses, such as Whitbread and Costa Coffee.

Traffic Analysis Hub

Traffic Analysis Hub (TAHub) is a sister charity that STOP THE TRAFFIK founded in 2017 and both organisations work together to prevent human trafficking.

TAHub facilitates the need for organisations in every sector to access the richest repository of stories of trafficking in order to prevent people trafficking.
